PROJECTS

Ecommerce Website | [GitHub Link](#)

- Developed a comprehensive e-commerce application utilizing a tech stack that includes **HTML, Thymeleaf, Bootstrap, JS and CSS** for the frontend, **Spring Boot** for the backend(Java), **MySQL** for database management.
- Built a dynamic e-commerce platform with features like CRUD operations, user authentication, cart management, order processing, and email notifications using *Spring Boot and Spring Security*. Implemented admin controls for efficient product and order management.

Job~Matcher | [GitHub Link](#)

- Developed with a **Spring Boot** for backend(Java) and **React.js** for frontend(typescript), styled using **Tailwind CSS** for a clean, modern UI, **MySQL** for database management.
- Job Seekers can search, apply, save jobs, and manage their dashboard with real-time email notifications (for applications and updates).
- Employers can post, delete, schedule jobs, and select applicants, with all secure transactions backed by JWT authentication.

ACHEIVEMENTS AND CERTIFICATIONS

- Python Fundamentals (**NASSCOM**) | [Link](#)
- Spring Framework for Java Developers (**Udemy**) | [Link](#)
- Solved 150+ DSA problems on geeksforgeeks platform (**geeksforgeeks**) | [Link](#)
- Secured 1st position in SHOW-CASE YOUR BUILD event, organized by Development Society Club of AEC.
